### **Ethics Statement**

My business is governed by a set of self-determined overarching ethical standards and values. These values signify my philosophy for providing certified alternative therapy services of Equine Massage & Myo-Manupulative Therapy, Light Therapy (human and animal), PEMF Therapy (human and animal), Kinesiology Taping, Cranial Sacral (Equine), AcuPoint/TCM (Equine) and Reiki/Energy Work. It is my aspiration to achieve these values in every way possible throughout my professional endeavors.

My highest priority is to maximize the health and wellness of every client. I desire to maintain a reputation of integrity and will always refer to medical or veterinary professionals in instances where I believe a client's issues to be beyond my scope of practice, regarding human or animal. To work with other professionals for the benefit of the client's health and wellness, and to communicate both the benefits and limitations of alternative therapies to client's and their professional team.

I encourage my clients to take personal responsibility for their health and that of their animals. I believe that every person should play an active role in improving and maintaining good health. I will educate my clients to the greatest extent possible to take personal responsibility for their health and that of their animals and recommend relevant exercises and equipment they can utilize between sessions (where appropriate) to ensure the best level of healing and wellness can be achieved.

Respecting the dignity of all persons and animals is of utmost importance to me. As a wellness provider, I will serve each client with humility. I accept persons of all walks of life and variety of conditions and will treat each individual and/or their animals with great respect.

Whilst my services are offered as entirely mobile, I will strive to make the environment of my practice on your property or at an event emotionally supportive, physically clean and safe, to aid in my clients' progress towards improving wellness and maintain necessary biosecurity standards.

I strive to maintain a current and comprehensive level of training, education and experience. To achieve and maintain my certifications, I am required to stay current with training and education. It is my intention to meet or exceed any such requirements because the result of good training and education will benefit my clients through better knowledge.
